# Meet Lucky Larry

**This is Lucky Larry Silverstein, the owner of the World Trade Center towers. On the day of 9-11, 2001, Larry just so happen to have a doctor's appointment that was canceled (so he says). Instead of showing up at the top of the World Trade Center tower for his routine daily breakfast, that he has traditionally done for many years, he decided to walk around New York City. Lucky Larry survived the 9-11 attacks as did his family. Larry just so happen to take out a LARGE insurance policy on his world trade center properties weeks prior to the attacks that explicitly included "terrorist attacks". Pictured with Lucky Larry is his daughter Lisa. She also so happen on that frightful day miss work and escaped harm. Also, Larry's son was running late for work. He too worked at the World Trade Center. Why is Larry so damn "lucky"? He & his family cheated death and he is walking around with billions of dollars in his pocket.**

**Way to go Larry! You LUCKY bastard!**

**Seismic Proof – 9/11 Was An Inside Job (Updated Version II)**  
by Craig T. Furlong & Gordon Ross

There is an appointed time for everything  
And there is a time for every event under heaven  
Ecclesiastes 3:1

**SUMMARY**  
On September 11, 2001, the seismic stations grouped around New York City recorded seismic events from the WTC site, two of which occurred immediately prior to the aircraft impacts upon the Twin Towers. Because these seismic events preceded the collisions, it is clear they were not associated with the impacts and must therefore be associated with some other occurrence. None of the authorities charged with the responsibility for the investigation of the events of 9/11 have proposed a source for these seismic events, nor have they given a valid reason for the difference in times between the seismic events and the aircraft impacts. Only by consideration of the evidence of basement explosions before the aircraft impacts, as experienced by William Rodriguez and 36 others, can an explanation be found for the fact that the seismic stations recorded seismic events originating from the WTC sites prior to the aircraft impacts. It seems unlikely that Middle Eastern terrorists could have overcome the WTC security and managed this kind of high-level, technological coordination. Do the facts presented here, simple and few, raise the possibility of inside involvement in 9/11/01, both before and after the attack?

**OVERVIEW**  
This paper is primarily concerned with the factual data surrounding the exact impact times of the two aircraft that hit WTC1 and WTC2. This is neither theory nor hypothesis, but a statement of publicized facts regarding the timing of the aircraft impacts. There exist two separate precision data time sets that address when the aircraft crashed into the Towers. Both data time sets are based on UTC (Coordinated Universal Time, the world's atomic clock system) and the sources that determined these times were prestigious, reliable and credible. There is no question regarding the precision and accuracy of the instruments used to record both data time sets, since their entire function depends and relies upon temporal accuracy, and therefore there can be no doubt that both data time sets are correct. The time data sets represent objective scientific data recorded by two separate, independent entities.

The problem is the data sets have different impact times.

These times were given out years ago but at different times. Lamont-Doherty Earth Observatory at Columbia University (LDEO) gave its findings around the time of the event with what it thought were impact times based upon the seismic data recorded, while the 9/11 Commission published its impact times, based upon FAA radar data and air traffic control software logic, years later in its Final Report. The Commission no longer exists.
